

Bamboo Square Pergola Manual

Parts Included:

(12) (8) (4)

Ladder side panel (2)

Open side panel (4)

Support Poles (4)

Corner Arches (4)

Hammer Corner Arch (4)

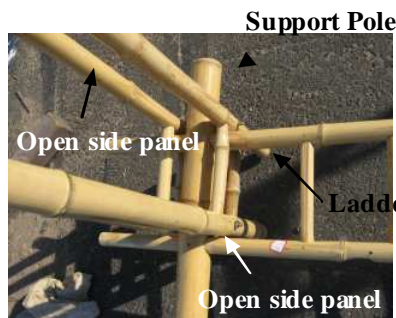

Fig. 1

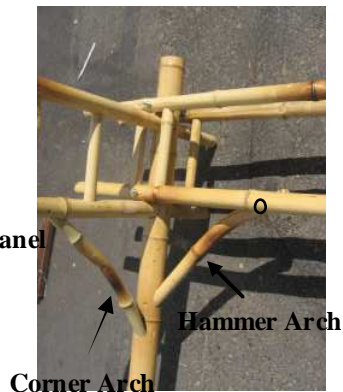

Fig. 2

Fig. 3

1.) The easiest way to setup the pergola would be to set each corner at a time. Matching the pieces together. First, slide one of the corresponding open side panels so that it is perpendicular to the ladder panel as shown in Fig. 1. Then match the support poles with the holes in Fig. 1. Third, slide another matching open side panel as shown in Fig. 1.

2.) Before screwing in the bolts, install the Hammer arch as shown in Fig.2. Pre-drilled holes should indicate where to install the hammer arch as well as the corner arch at each corner using the small bolts. After that, you can screw in using the longer bolts and nuts. Follow steps 1 and 2 until each corner is complete.

3.) To setup the roof, use the poles provided and install them along the top as shown in Fig. 3. There
